***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: Independent claim 1, 11 and 12 present limitation as a whole that are allowable over the prior art, specifically, recites the uniquely distinct features for "the at least two signal processing mechanisms simultaneously performing compressive coding processing to the television signal delivered over the desired channel such that each one of the at least two signal processing mechanisms performs compressive coding processing at a respective compression rate that is different than that at which any other of the at least two signal processing mechanisms performs compressive coding processing". The closest prior art of Yap et al. (US 2002/0092021) disclose a specifically designed for reception/tuning of plural programs, simultaneous recording of two or more programs, as well as simultaneously recording one program while viewing or playing back another program (paragraph 0087), Kim et al. (US 6,405,372) discloses simultaneously processing two tuner for view current channel and updating EPG (column 3 lines 39-67), and Sasaki et al. (US 2002/0150382) discloses at least two signal processing mechanisms means (paragraph 0094-0095), either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.
